ABOUT

I am a Web Developer with a background in Graphic Design. I enjoy creating functional and aesthetically pleasing applications while keeping the User's experience in mind.

SKILLS

Frontend	**Backend**	**Other**
HTML 5 • CSS • JavaScript • Bulma	NodeJS	Adobe Creative Suite

PROJECTS

Carpe Diem

github.com/calliebn/carpe_diem | calliebn.github.io/carpe_diem/   Project Manager/Developer

- A daily to-do list that will allow the user to add items, check off items and sort their list. Project also utilizes API's that will provide the user with a quote and a trivia fact
- As the project manager, I delegated the tasks to my team mates and assisted them when needed help to ensure a timely delivery. I also went through and refactored the code to ensure clean files.
- The project utilized HTML, CSS, JavaScript, Bulma, and the use of APIs

Javascript Quiz

github.com/calliebn/javascript_quiz | calliebn.github.io/javascript_quiz/   Developer

- A fun quiz that will test the user's knowledge of basic JavaScript. Earn points for right answers, but an incorrect answer will deduct time from the clock.
- As the developer, I coded a timed quiz that will show deduct time from the clock for every wrong answer. It will also cycle through the questions in a random order and the background color of the questions will change to show which answers are right or wrong.
- The project utilizes JavaScript, HTML, and CSS

Weather Dashboard

github.com/calliebn/weather_dashboard | calliebn.github.io/weather_dashboard/   Developer

- A weather dashboard built to show the current weather in the city of your choice as well as the 5-day forecast
- As the developer, I created a page that will allow the user to enter a city and will then display the current conditions and the five day forecast
- The project utilizes HTML, CSS, JavaScript, and the use of APIs

WORK HISTORY

2009-Present   Lead PageRaft Designer, Nxtbook Media
- Production Lead for PageRaft, a responsive design platform
- Collaborate with clients on design of print elements in their digital edition
- Create pages and styles using HTML,CSS, and JavaScript
- Train internal and external partners on how to use PageRaft
